

Notice to the authors

The Romanian Journal of Angiology and Vascular Surgery published clinical and experimental studies in angiology and vascular surgery.

As the official publication of the Romanian Society of Angiology and Vascular Surgery (RSAVS) the Journal will publish, after careful peer review, selected papers presented at the meetings of the organization, as well as original articles from members and nonmembers of the RSAVS. Contributions can take following forms:

- *Editorial* - commissioned by the Editor in Chief or Board of Editors; expresses his personal opinion. A maximum 4 typewritten pages and 15 references will be accepted.
- *Original articles* - must be an original contributions to the subject treated. A maximum 12 typewritten pages and 30 references will be accepted. The article must be subdivided into the following sections: abstract, introduction, material and methods, results, discussion and conclusions.
- *Review article* - must outline current knowledge and give a up-to-date critical analysis of the subject. A maximum 15 typewritten pages and 50 references will be accepted.
- *Case report* - give a description of particularly interesting clinical cases. A maximum 8 typewritten pages and 15 references will be accepted.
- *Therapeutical notes* - intended for the presenting and assesment of drugs. A maximum 6 typewritten pages and 15 references will be accepted.
- *Technical notes* - description of a new surgical technique or changes to techniques already in use. A maximum 6 typewritten pages and 15 references will be accepted.
- *Book reviews*
- *Letters to the Editor* - coments and critical observations on articles appearing in Journal. A maximum 2 typewritten pages and 5 references will be accepted.

The manuscripts must be prepared in strict compliance with the instructions for Authors published below. Authors not conforming to international standards (International Committee of Medical Journal Editors. Med Educ 1999; 33(1): 66 - 77 or: <http://www.ama-assn.org/journals/jama/sc6336.htm>) will not be considered and returned for retyping. Spelling should conform to the Concise Oxford Dictionary of Current English Usage. The Editor reserves the right to modify typescripts to eliminate ambiguity and repetition and improve communication between author and reader. If extensive alterations are required, the manuscript will be returned to the author for revision. Papers accepted for publication become the property of the Romanian Journal of Angiology and Vascular Surgery and may be published in whole or in partly not without the written permission of the author(s) and the Journal. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic database, video discs etc., without first obtaining written permission from the Editor on behalf of the Romanian Journal of Angiology and Vascular Surgery.

SUBMISSION OF MANUSCRIPT

Three copies of papers together with one hard copy of the manuscript (including figures and tables with legends) in English should be sent to:

Romanian Journal of Angiology and Vascular Surgery
CLINICA CHIRURGICALA II
Str. Clinicilor 4-6
4006 CLUJ-NAPOCA
ROMÂNIA

The covering letter should identify the name, address, phone, fax number and e-mail, if available, of the author responsible for all future correspondence regarding the manuscript. The principal author is responsible for ensuring that coauthors agree to the inclusion of their names before submission of a manuscript. The author warrants that the article is original, it is not under consideration for another journal and has not been previously published. Previous publication in abstract form must be mentioned. All illustration should be original. Illustrations taken from other publications must be accompanied by the permission of the publisher.

Statements or opinions that are expressed in the Journal reflect the views of the authors and do not necessarily not necessarily represent the official policies of the RJA VS. The advice and opinion in this journal is believed to be accurate and true at the date of publication. The Editors and Publisher disclaim any responsibility or liability for any errors or omissions that may be made. The publishers can give no guarantee for information about drug dosage and application thereof contained in this journal.

Manuscript on floppy disk or CD

Authors are requested to provide their manuscript in machinereadable form (preferably Microsoft Word saved as "text only") to speed up the editorial process. It is essential that, for each version of the manuscript, the hard copy and the file on the disk/CD are identical. Authors should use new/clean disks, rather than reformatted disks, and the disk should contain the relevant files only. The manuscript should be divided into separate files for text and illustrations. It is essential that the hardware and the work processing package are specified on the disk. Articles can also be submitted via E-mail at: igherman@insin.hearticj.ro.

To be accepted via E-mail documents must be in "Word" (.doc) format. When necessary, JPG, PCX, GIF, CPT image format will be accepted. Files can be compressed using WinRAR. The floppy or CD should be labeled with the Author's name, article's title, text editor's name and its version.

Please visit the RSAVS WebSite at <http://rsavs.tripod.com> where you can easily access the latest issue of the Romanian Journal of Angiology and Vascular Surgery, previous issues summaries and abstracts, instructions for abstract or article submission.

PREPARATION OF MANUSCRIPT

Submitting the manuscript in the correct format will expedite the reviewing process and obviate undue delay in publication.

The manuscript should be typed double spacing throughout the text on A4 (210 x 297 mm) paper, with margin about 4-cm all around. Type on one side only. All papers should be numbered automatically serially, bottom, center. Manuscripts must conform to standard English usage. The manuscript should be presented in the following order:

Title page. The title page should be short and include: article titles (with no abbreviations); first name and family name of the authors, affiliation (Institute, University, Department and Hospital where each author works). Name, address and telephone number and e-mail, if available, of the author to whom all correspondence and proofs should be sent. Dates of any congress where the paper has already been presented. Mention of any funding or research contracts.

Article should be arranged as follows:

Abstract. An abstract should not exceed 150 words in length. Original articles should use the following headings in their abstracts: *purpose of the study or background, methods* – design of the study (randomisation, blinding, prospective or retrospective etc.), the setting (hospital or private practice, primary or tertiary care etc.) and the patients or participants in the study; experimental design; *results* (should be summarised with relevant statistical indices); *discussion and conclusions* (that are directly supported by the data should be stated, with equal emphasis on positive and negative findings); *3 – 6 key words* (in alphabetical order) and they should not include words contained in the title of the article. Key words should refer to the Medical Subject Heading (MeSH) of the Index Medicus. The abstract should be written both in English and Romanian.

Main text. The text will usually be divided into following sub-headings: *Introduction* (briefly give the background to the work reported and concisely state the hypotheses tested), *Material and Methods* (describe these in enough detail to permit the work to be repeated in other clinics or laboratories, state the statistical methods used to analyse the results), *Results* (present these in logical sequence in the text, tables and illustrations, do not include material appropriate to the Discussion), *Discussion* (discuss the results with respect to the hypotheses proposed in the Introduction and relation to the literature, include an analysis of possible sources of error) and *Conclusions* (do not reiterate data presented in the Results section). Manuscript involving research in human subjects must include statement in Method section indicating approval by the institutional review board and noting that informed consent was obtained from each patient, in compliance with Helsinki Declaration of 1975 as revised in 1983. Do not use patient's names, initials, or hospital medical record numbers. Manuscripts reporting animal experiments must declare that research reported was undertaken in compliance with the International Guiding Principles for Biomedical Research Involving Animals recommended by the WHO. Standard abbreviation should be used, unusual or coined abbreviation should be used sparingly and spelt out the first time they appear in the text, followed in parentheses by abbreviations. Do not abbreviate disease, symptoms or anatomic characteristics. Statistical significance should not be confused with clinical relevance.

Illustrations. Illustrations that repeat information in the text will be omitted. Legends should be self-explanatory and typed on a separate sheet. The legend should incorporate definitions of any symbols used, and all abbreviations and units of measurement should be explained.

Tables. Each table must be submitted on a separate sheet of paper, numbered in Roman numerals in the order of their citation in the text and accompanied by short titles. Tables should be kept as simple as possible and wherever possible a graphical presentation used instead. Tables should be self-contained, but not duplicate information contained in the text.

Figures. Figures must be numbered in sequence with Arabic numerals. Do not mount illustrations and do not write on the reverse side. On adhesive-back labels, type the figure number, title of article and first author's name and draw an arrow to indicate the top edge. Photographs should be submitted as glossy prints, ideally half-plate (80 x 170 mm). Subjects must not be identifiable from photos unless written permission from the person for their identity to be disclosed is supplied. Histological photographs should be accompanied by the enlargement magnitude and method of coloration. Coloured illustrations will be reproduced at the author's expense. When colour illustrations are preferred, please submit colour photos or hi res (300 dpi) digital images (TIFF, EPS OR JPEG formats). If table or any data therein have been previously published, a footnote to the table must give full credit to the original source. Permission must be obtained from modified tables and figures. All illustrations should be clear, in high contrast.

Acknowledgements. The source of financial grants and the contribution of colleagues or institutions should be acknowledged.

References. In the text, references should be made using superscript Arabic numerals in the order in which they appear. The reference list should be typed on a separate page in numeric order as the citations appear in the text. References must follow the general arrangement and punctuation outline in: International Committee of Medical Editors. Cite the names of all authors when there are six or less; when seven or more list only the first three followed by *et al.* The references must contain only the authors that are mentioned in the text, numbered using Arabic numerals and in the order in which they are first cited. Abbreviate journal names according to the Index Medicus; if the journal is not listed by Index the full title should be given. Personal communications and manuscripts that are not yet accepted, should not be included in the reference list.

The sequence for a journal article is: author(s) surname and initials; title of article; journal name (abbreviated as in Index Medicus or written in full if no abbreviation quoted); year of publication; the number of volume, first and last pages number.

The sequence for a book is: author(s), editor(s) or compiler(s), title and edition number, place of publication, publisher's name, year of publication, first and last pages. Examples:

Dion J, Gracia CR, Estakhri M, Douville J, Stancanelli V. Totally laparoscopic aortobifemoral bypass: a review of 10 patients. *Surg Laparosc Endosc* 1998, June; 8: 3; 165 – 70.
Foley DW, Merissen MW. Extremity Arterial Disease. In: Foley DW. *Color Doppler Flow Imaging*. Andover Med Publ inc. Boston, 1991: 1109 – 127.
Browse NL, Burnard KG, Irvine AT, Wilson NM. *Disease of the veins*, 2nd edn. London: Arnold, 1999.

COPYRIGHT / OFFPRINTS

Authors submitting manuscripts do so understanding that the contribution is to this Journal only. If accepted for publication, exclusive copyright of the paper and illustration shall be assigned to the Journal, if the paper is accepted. In consideration for the assignment of copyright, the publisher will supply 5 offprints of each paper. Further offprints may be ordered at extra cost using order form, supplied with the proof. The Editor retains the right to decide time of publication.
